

Quality by Competence

The Jäckering Group was founded at the beginning of the last century by the Jäckering family in Hamm. Since 1945 the group has become an important company with diverse activities in various fields.

On the basis of our experience we offer our customer groundbreaking innovation, together with proven reliability and professional support. Of particular strategic importance are the intense internal group research activities. Nearly 200 employees in Hamm, Obersteeg, Dülmen and Altenburg are the backbone of a company characterized by strong innovative capability.

JÄCKERING

Quality by Competence
Qualität durch Kompetenz

Jäckering Mühlen- & Nahrungsmittelwerke GmbH

Jäckering Mühlen- und Nahrungsmittelwerke GmbH produces wheat flour, wheat starch and gluten for food, pet-food and non-food industries all over the world. The mill has an annual capacity of 250,000t of wheat. Large parts of the flour are directly supplied to the starch production where approx. 140,000t wheat starch and 20,000t wheat gluten are produced.

Altenburger Maschinen Jäckering GmbH

Altenburger Maschinen Jäckering produces Air Turbulence Mills and Dryer-Pulveriser under the brand name ULTRA ROTOR. Since 1955 our engineers are continually working on improvements and new applications to make sure that we can offer state-of-the-art technologies.

Jäckering Grund- & Rohstoffverarbeitung GmbH & Co. KG

Jäckering Grund- & Rohstoffverarbeitung GmbH & Co. KG deals with processing of thermoplastics. Several thousand tons are processed every year. Based on the technology of the Ultra-Rotor PVC-sludges and By-products of the PVC production are milled, dried and extruded.

Jäckering Processing GmbH

Jäckering Processing deals with grinding and mixing of products for non-food industries. Beside normal milling we are in the position to simultaneously grind and dry by introducing hot air into the system. This is an excellent method of handling heat sensitive or sticky materials.

Spedition und Lagerhaus Jäckering GmbH

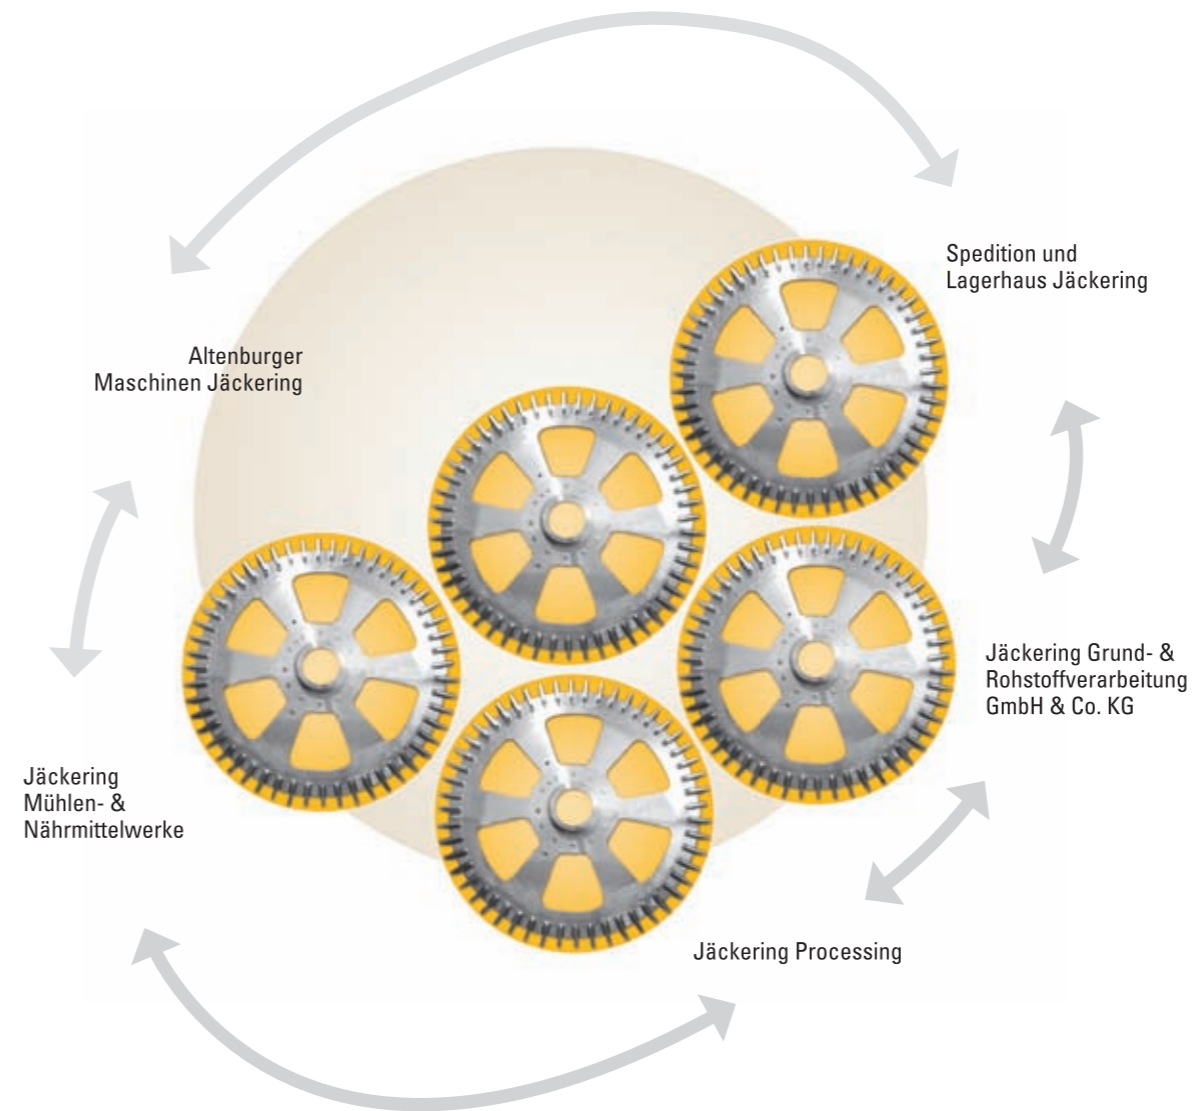

Spedition und Lagerhaus Jäckering deals with trans-shipment and storage of wheat, soy-groats and other animal feed for its customers. Thousands of sqm storage space in hangars and a 300m long dock at the Datteln-Hamm Kanal are available to fulfill nearly every wish of storage, transportation and trans-shipment.

The Jäckering Group

The Jäckering Group is an internationally active company with core capabilities in the field of wheat starch & gluten, construction and engineering as well as processing and preparation of thermoplastics.

The supreme objective is that all products manufactured in-house are of superb quality and groundbreaking innovation.

Focused on its customers, its potentials and the future market, Jäckering is a global, owner-managed enterprise with a long tradition which convinces with its products, highly qualified staff members, outstanding efforts and innovation.
